

ChimneyCapDesign.com

Installation: This product comes fully assembled. No drilling or gluing. Insert base of the cap into chimney pipe, wrap stainless steel (copper) strap around cap base legs and tighten with provided bolt and nut. A stainless steel (copper) strap locks the cap down onto the base of the chimney and holds it in place preventing the wind from blowing it off.

If you are wondering what's inside of the DraftMaster, a little secret unveiled here. As you can see, it could be easily disassembled into 3 parts for easy cleaning but it shipped pre assembled.

DraftMaster with CB (DMcb) installation
